

Telephone • High-Speed Internet • Cable TV/HDTV

The city-wide fiber optic network will provide a choice for services on a completely different type of network than current providers.

- All fiber, all the way, to all homes and businesses.
- LOWER prices with FASTER service.

- Monticello's city-wide fiber optic network **does not require any tax levy.**
- The project is supported by revenue bonds.

Revenue bond financing protects City taxpayers!

- Revenue bonds will be sold to private investors who buy them only when they expect the business to succeed based on the business plan.
- Revenue bonds **are not** linked to the tax system of the City. The City is not obligated to pay revenue bonds with taxes

Fiber optics is an investment in our community, for our future

and for our children and grandchildren.

- Insure Monticello's long term economic development both locally and globally.
- Make Monticello a world class high technology community creating an attractive place to live, work and shop.
- Projected profits will be invested back into the community.

Operation of this telecommunications business would include a **LOCAL OFFICE** staffed with **LOCAL PEOPLE** in a Monticello office to help with customer service and technical assistance.

A city-wide fiber optic network will create **another choice for services.**

Customers may choose to purchase services from the City or stay with their current provider.
